SERIOUS HUNTWEAR FOR REAL WOMEN

## Technical Specifications

Próis Hunting Apparel for Women (pronounced 'pro-iss') is quickly gaining a foothold in the women's hunting industry. Launched in 2008, Próis made its mark by providing female hunters with a long-awaited line of high-performance, technical huntwear specifically designed for women. The line provides gear that can withstand the extremes and the rigors of the field, yet is designed expressly to fit the female form. How does Próis differ?

**Fabric Choices:** Próis believes the cornerstone to the best outdoor gear lies in its fabrics. Simple cotton will not do. Complex, compressed fabrics offer windstopping, moisture wicking, silence and waterproofing to the line. Our Pro-Edition series boasts a 3-ply bonded fabric that offers soft tricot on the shell, windstopping laminate and microfleece which offer optimal thermoregulation without the bulk that is a hindrance in the field. Our Ultra Shirts wick away moisture, which is a must-have feature in both hot and cold climates. Our Eliminator and Extreme Lines offer hard-core waterproof/breathable fabric choices that are rugged, silent and functional. Our Sherpa offers plush warmth. All of our pants are 100% polyester tricot which offer silence, softness and a durable snag-resistance. Próis then adds its signature nylon tricot lining system to all jackets, vests and lined pants to offer warmth, softness and ease of layering/movement.

**Functional Features:** Each piece of gear is thoroughly thought out and field tested by women who hunt hard. Whisper silent magnetic closures on cargo pockets enhance silence in the field. Deep set lumbar pockets in all jackets and vests offer storage of soft goods and gear. Pleated knees in our pants optimize articulation. All pants are engineered with drawstring/cordlocking at the hemline to pull the pant close to the boot. Scapular Drop pockets have been developed to lie between the shoulder blades (a highly vascular area on the body) to house activated handwarmers which promote optimal thermoregulation. Taped seams and nylon tricot lining push our Eliminator (waterproof/breathable) Line to the front of the pack.

### Commitment to Serious Female Hunters:

Próis was designed with the serious female hunter in mind. Each piece is created to provide the highest level of function to help improve performance in the field. We are all about the woman who is passionate about her pursuits. We refuse to settle for downsized mens gear, upsized children's gear or simple clothing that is substandard. We realize women work hard to perfect their craft and they deserve the best.

### Proudly Manufactured in the U.S.A.:

Próis is committed to supporting our domestic economy in every way possible. They manufacture all of the gear in California and work diligently to purchase goods produced in the U.S.A. when possible.
